Summary

- Performance and result driven **Java Full Stack Developer** with an experience of **4 years**, targeting challenging positions in the field of **Backend Java Development, Java Full Stack Development and Frontend Development**.
- Extensively worked on SDLC stages Requirements analysis, detail design, coding, testing and code rework.
- Managed well-functioning databases and applications; capable of writing effective **APIs**.
- Proficient in providing operational efficiency, performing maintenance & enhancement operations, optimizing code to achieve zero defect delivery; achieved committed product content and quality goals in a timely manner.
- Capable of using markup languages like **HTML5, CSS, JavaScript, React** to create user-friendly web pages, maintaining and improving website and optimizing applications for maximum speed.
- Experience in performing multiple activities starting from understanding **customer requirements**, deriving the right solution, **feasibility study, solution planning, architectural design, evaluation & solution implementation, scalability, migration** & transformation and supporting after **go-live**.

Technical Skills

Programming Languages: Java 17, Python | **Databases:** Relational: MySQL, Oracle | **DevOps:** Git, Docker, Azure DevOps

Testing Tools: Selenium, JUnit5, Mockito | **Frameworks:** Spring Boot, Spring, Spring MVC, Spring Cloud, React

Architectural Patterns: Microservices, Rest API, Kafka | **Web Technologies:** HTML, CSS, JavaScript, JSON

Work Experience

Bosch Global Software Technologies (Bosch), Senior Software Engineer

Nov 2022 – Present

- Worked in development of a Web tool by using **Spring Boot, Rest API and Spring Microservices**
- Estimation, Development and Documentation of the new features or enhancements.
- Solely developed and maintained the IPC Configuration Editor, enhancing configuration management processes.
- Resolved bugs, conducted thorough testing, and wrote detailed requirements for new features.
- Ensured code quality by following best practices and AUTOSAR standards.
- Worked on POCs to create custom components, which are reused across Project.

Tata Consultancy Services (TCS), Software Developer

Oct 2020 – Nov 2022

- Worked as Developer for project TCS BANCS which is a Banking Application. TCS BANCS is a core banking software suite developed by Tata Consultancy Services for use by retail banks.
- Managing back-end using **Java 8, Spring Boot technology and Spring Microservices**
- Handling Production issues with quick turnaround time and help customer to resolve them.
- Led successful deployment of project packages, ensuring seamless integration and functionality.

Reva Solutions, Software Developer

Nov 2019 – Jan 2020

- Created a user-friendly website for conducting online examinations, enhancing accessibility and efficiency.
- Developed workflows in Documentum tailored to specific requirements.

Education

- Bachelor of Computer Science Engineering, JNTUH

Aug 2015- May -2019
